Mr. John W. Roberts
FairTec Enterprises, Inc.
7711 Falstaff Road

Dear John:

I wanted to tell you about our experiences with Militec-1 in our shop and in my personal car.

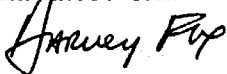

I own a 1984 Nissan Stanza and was getting 21 miles per gallon. I added Militec-1 to the engine transmission and power steering in the proportions indicated on the bottle. Though I have an older engine, I still used only 2 ounces per quart in the engine. The results were that the engine runs more quietly, has more power and my mileage increased to 24 miles per gallon, an increase of 3 miles per gallon or about 15%. A customer put Militec-1 into his Ford C-6, V-8, truck engine and noticed it ran quieter.

We use Militec-1 in our transmission repair shop for several different purposes. First, we have used it very successfully to correct automatic transmissions that won't shift properly. Most of the time, adding 4 ounces of Militec-1 to the existing fluid will correct the problem without further repairs. In transmissions that have extensive damage requiring major, costly repairs we have used Militec-1 to treat the transmission extending its usefulness until repairs are definitely required.

In addition, we use Militec-1 in troublesome transmissions we repair to ensure trouble free operation.

We are very happy with the performance of Militec-1 and recommend it to all of our customers.

Very truly yours,
AAL-MATIC TRANSMISSION SERVICE

Harvey Fox, Manager
