Mr. Stuart Peeke
Sealpro, Inc.

Dear Stu,

I wish to thank you for introducing me to Militec-1, a truly amazing product.

We are using Militec-1 in our special needs vehicles, wheel chair vans, and the station wagons. The results have been an increase in gas mileage and easier start ups, which is remarkable in the cold weather due to longer idling and longer running times. The emissions have been reduced substantially, and all the engines run quieter. On several of the vehicles we had to replace 180° thermostats with 175° thermostats due to the lower operating temperatures, which we believe relates to the lower friction from using Militec-1. One of our vehicles had only 8 ounces of Militec-1 in the five quart crankcase. Someone had forgotten to add the motor oil! The vehicle was driven over six miles at 60 mph before the red light came on; the only damage was to one journal. We cleaned the crankcase and put a new set of bearings in, then we put the vehicle back in service. Militec-1 saved us from having to do a complete engine overhaul.

The Maintenance Department in the school system is now convinced and is using Militec-1 in the air compressors as well as in all the vehicles. We have noticed a decrease in amperage by over 10%, and are finding new uses for Militec-1.

We are very pleased with this great product.

Sincerely,

Chris Cady
